

# Khoundokar Samiun Nobi Samid

## Full-Stack Developer

+880 1950429174 | [nobisamid@gmail.com](mailto:nobisamid@gmail.com) | [LinkedIn](#) | [GitHub](#) | Dhaka, Bangladesh

---

## Professional Summary

Aspiring **Full-Stack Developer** with hands-on experience delivering performant, scalable and user-focused web applications. Skilled in turning complex requirements into elegant solutions through clean architecture, efficient state management and seamless API integration. Thrives in collaborative, project-based environments and passionate about building products that truly make an impact. A continuous learner, currently exploring Docker, AWS and DevOps fundamentals to enhance deployment efficiency and scalability.

## Skills

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Redux, Zustand, Tailwind CSS, TypeScript, Next.js.
- **Backend:** RESTful APIs, Node.js, Express.js, Redis, Authentication (JWT).
- **Database:** MySQL, MongoDB.
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Docker (Basic), CI/CD(Basic), Firebase, AWS(Basic).
- **Soft skills:** Problem-Solving, Analytical Thinking, Team Collaboration, Clear Communication.

## Professional Experience

### Freelance MERN stack developer (Project-based)

Remote collaboration Team | Feb 2022- Dec 2023

- Collaborated with a small team of developers to design, develop and deploy client-based web projects using MERN stack
- Participated in code reviews, optimized performance and maintained clean Git branching workflows
- Delivered production-quality applications deployed on Vercel and Firebase

## Projects

### Sal-E | [Code](#) | [Live](#)

- Designed a modular architecture to handle thousands of concurrent users with minimal latency.
- Integrated real-time inventory sync between admin and customer dashboards.
- Implemented secure payment flow with Stripe and optimized checkout for 40% faster load time.
- Built a custom image upload pipeline using Cloudinary for efficient media management.
- Used Technologies: React.js, Node.js, Express.js, MongoDB, Axios, Zustand, Stripe API, Redis, Framer motion and Tailwind CSS.

### Let's Roll | [Code](#) | [Server](#) | [Live](#)

- Full Stack and Mobile responsive online Skate-Board selling website.
- CRUD executed, Google and Email authenticated, Admin panel for customization.
- Used Technologies: HTML, CSS, React.js , React-Router-Dom, Firebase-Authentication, Node.js, Express, MongoDB, Material UI.

## Education

**B.Sc.**(Hons) in **Mathematics** – University of Chittagong

## Certifications

- [Complete Web Development](#) – Programming Hero
